

IAMSick of IAMS!

Why does Iams make dogs (and those who love them) sick?

A PETA investigation into an Iams contract laboratory revealed the following:

- dogs kept in barren steel cages for up to six years at a time
- dogs gone insane from intense confinement
- dogs with their vocal cords severed and huge chunks of muscle cut from their bodies
- dogs with tubes stuck down their throats

These tests are not required by law. Dog food tests can be done humanely in a home environment or veterinary clinic.

If this makes *you* sick, please don't buy Iams products.

Visit IamsCruelty.com to see undercover footage and learn how you can help.

Thanks!
